Russia-Ukraine Crisis: Position of India

Dalia Hossain

Abstract of the speech

Russia's invasion of Ukraine is the biggest military mobilization in Europe since World War II. Now following the launch of Russia's full full scale invasion on Feb. 24, 2022, the largest mobilization of forces Europe has seen since 1945 is underway. Relation between two countries became hostile after the 2014 Ukrainian revolution which was followed by Russia's annexation of Crimea from Ukraine, and due to Russia's backing for the separatist fighters of the Donetsk People's Republic and the Luhansk People's Republic in a war, conflicts that had killed more than 13,000 people by early 2020. Now, the question is what was Putin's original goal? The Russian leader's initial aim was to overturn Ukraine and depose its government ending for good its desire to join the Western defensive alliance NATO. After a month of failures, he abandoned his bid to capture the capital Kyiv turned his ambition to Ukraine's east and south.

Launching the invasion on 24 February, he told the Russian people his goal was to "demilitarize and de-Nazify Ukraine". He declared aim was to protect people subjected to what he called eight years of bullying and genocide by Ukraine's government. Another was soon added "ensuring Ukraine's neutral status". The claims of Nazis and genocide in Ukraine are completely unfounded but part of a narrative repeated by Russia for years. However, an opinion piece by state-run news agency Ria Novosti made clear that "denazification is inevitably also be de-Ukrainisation", —in effect erasing the modern state. And it is Russia that is now accused by the international community of carrying out of war crimes. Several countries including US and Canada go further call it genocide. After so much destruction, the Russian leader's words might very hollow now. "It is not our plan to occupy the Ukrainian territory, we do not intend to impose anything on anyone by force.

India's response to the Russian invasion of Ukraine has been distinctive among the major democracies and among U.S. strategic partners. Despite its discomfort with Moscow's war, New Delhi has adopted a studied public neutrality toward Russia. It has abstained from successive votes in the UN Security Council, General Assembly and Human Rights Council that condemned Russian aggression in Ukraine and that far has refused to openly call out Russia as the instigator of the crisis. An Indian scholar has called this stand of India in Ukraine crisis as "a subtle pro-Moscow position". Russia is viewed as having been a sturdy friend of India's going back to 1955 and remained as a major weapon supplier from then to now.

Abstract

Contextualising Gender and Border: An Analysis of Geetanjali Shree's *Tomb of Sand*

This talk attempts to address how Geetanjali Shree, in her latest novel *Tomb of Sand*, lays the bricks of the experiences of an elderly lady to prepare a symbolical tomb for herself to stick in. Divided in three parts, the novel starts with the main protagonist – *Ma*, who is seen lying on a bed with her back towards the world signifying her resolution not to cater to the norms of the society again and the narrative flows through all her concerns and worries. The third person omniscient narrator gradually fills the narrative with other characters and the issues like gender, border and identity which saturates the mind of any and every reader. The narrative posits certain questions regarding the themes mentioned earlier, to be understood and answered by the readers.

PHARAOH

CLAY COIN

Worth realizing that in Ancient Egypt the use of money was still not known, as a receipt and payments of Pharaoh were paid by doing tasks.
Not just the Egyptians,
Other ancient cultures like Indus Valley Civilization, Mahenjo - Daro , etc used different shapes of clay balls/ clay tablets as Currency to Trade, later replaced by precious metals. In ancient times, a lot of trading was done by water or land, so the system of Account Keeping were likely used to keep a track on this.
Accountants took records of what was sold and brought into country. All the voluminous records were kept in depositories. The Accountants back then also in-charge to keep track of taxes being collected from people, so the wealth of the king is also accounted, payments provided were also accurate and all the records were made on time | Time Keeping!
