Throughout the academic period spanning from 2018-2019 to 2022-2023, we have diligently upheld our commitment to academic excellence by conducting regular internal assessments on the covered topics of the syllabus, facilitated by our dedicated departmental teachers. In alignment with our ethos of transparency and fairness, notices regarding these internal assessments are consistently issued to our students at least a week prior to the examination dates. The assessments themselves are structured to gauge comprehension through a combination of multiple-choice questions (MCQs) and short questions. Following the examinations, our esteemed teachers undertake thorough scrutiny of answer scripts, ensuring meticulous evaluation. Subsequently, students are promptly and transparently informed about their scores, fostering an environment of accountability and feedback. To preserve the integrity and authenticity of the evaluation process, copies of these internal assessments are securely maintained in departmental custody. Additionally, each department undertakes at least one internal assessment per semester, underscoring our commitment to comprehensive evaluation.

I am pleased to affirm that no grievances have been raised from the students' side regarding these internal assessment procedures. Our students' satisfaction and feedback are pivotal to us, and we remain steadfast in our dedication to continuous improvement.
